AFRICA:

**MTN Group reorganises senior executive posts**

The MTN Group has been involved in the reorganisation of its senior executives. The company has selected Themba Khumalo, the present CEO of MTN Swaziland, for the post of CEO of MTN Rwanda.

Khumalo’s position at MTN Swaziland will be taken up by Tebogo Mogapi, the acting executive of consumer business unit at MTN South Africa. The new appointments will come into effect from 1 April 2007.

In 1999, Khumalo was appointed as the chief technical officer at MTN Swaziland and was responsible for managing the deployment of the company’s network. He was appointed as the CEO in 2003 and the company managed to add around 185,000 subscribers under his leadership.
Tebogo Mogapi was selected as regional manager at MTN South Africa in 2000. In 2001, he was appointed as the channel manager of MTN Nigeria and was managing the distribution network of the company.

According to Phuthuma Nhleko, the president and CEO of the MTN Group, the restructuring move is in line with the company’s plans to take advantage of the existing employees of the company and also appoint new employees.

For further information about MTN, please contact the company in Cape Town (South Africa) on +27-214-017-400 or visit [http://www.mtn.co.za](http://www.mtn.co.za).

**BURUNDI:**

**Econet buys 65 percent stake in ST Cellular**

Econet Wireless has acquired a 65 percent stake in ST Cellular, a Burundi-based mobile operator. The move was in line with Econet’s strategy to expand its operations outside Zimbabwe. The financial details of the acquisition were not disclosed.

Econet is all set to expand its operations outside Zimbabwe. The company plans to invest a significant amount of capital to enhance its network coverage in a bid to increase its subscriber base to 200,000.

The company anticipates a huge potential in its Burundi operations. At present, the country, which has a population of 7 million, has a mobile penetration of 2 percent. The Burundi’s telecom market comprises three main players – Telecel Burundi, Africell and Spacetel.

Sure Kamhunga, Econet Wireless Group, PO Box 785743, Sandton, 2146, South Africa. Tel: +27 119965500 Fax: +27 119965511 E-mail: sure@econetwireless.com.

**EGYPT:**

**Telecom Egypt posts financial results for 2006**
Telecom Egypt (TE) has announced its annual financial results for the year ended 31 December 2006. Akil Beshir, the chairman of telecom Egypt, stated that the company has witnessed an improvement in its performance in 2006.

Beshir added that the successful execution of the company’s tariff rebalancing programme helped in increasing the subscription revenues and monthly ARPU by 11 percent and 6 percent, respectively.

TE Data, TE’s retail Internet business, reported a 200 percent increase in ADSL subscriber base. The company also managed to capture 45 percent of the market share. The Internet and data revenues of the company were reported as EGP 184 million (USD 32.47 million).

TE reported an increase of 11 percent in the total consolidated operating revenues to reach EGP 9.5 billion (USD 1.68 billion) in 2006 as compared to EGP 8.5 billion (USD 1.50 billion) in 2005.

Majority of the company’s revenues (65 percent) is generated from its retail services. It reported a 24 percent increase in its local voice revenues to reach EGP 1.97 billion (USD 347.66 million) as compared to the corresponding figure in 2005.

The consolidated EBITDA increased by 16 percent to EGP 5.4 billion (USD 952.97 million) in 2006, as compared to the corresponding figure in 2005. The net profit of the company increased to EGP 2.4 billion (USD 423.54 million), reflecting a 16 percent increase over the net profit in 2005.

The amount of investments increased to EGP 609 million (USD 107.47 million) in 2006. The company acquired a 19.16 percent stake in Vodafone Egypt in 2006. The stake helped the company to generate significant income.

For further information, please contact Tarek Tantawy, CFA, Director, Investment, Treasury & Investor Relations, by telephone on +202-5788-826, by fax on +202-5789-314; or Eman Anis, Assistant Manager; Investor Relations by telephone on +202-5788-787, by fax on +202-5789-314 and by email at investor.relations@telecomegypt.com.eg.

ISRAEL:

Bezeq cancels stock option programme

Bezeq announced that the company will revoke the stock option programme that it had planned to implement for its executives. The decision followed the
objection by the Israel Securities Authority to continue with the stock option programme.

Bezeq stated that the company’s board has plans to introduce a new programme for executives. Although the stock option plan for low-level employees will not be cancelled, a significant change in the estimated amount which was ILS 170 million (USD 40.64 million) will be made to comply with the authority’s objection. The new plan is estimated to cost nearly ILS 286 million (USD 68.37 million).

The securities authority has enhanced its supervision of stock options and bonus plans after Israel’s leading banks, Bank Hapoalim and Israel Discount Bank, had to reduce top executives’ salaries on account of criticism over their size.

Bezeq had announced the options programme in February 2007; it was in line with the company’s efforts to improve the efficiency of workers by offering compensation based on performance. Bezeq is also reorganising and offering pink slips to employees to reduce costs.

According to the original plan, 40 executives will be allowed to purchase 56.8 million shares, or about 2.2 percent of issued capital, at ILS 5.42 (USD 1.29) per share. Yacov Gelbard, the CEO of Bezeq, was expected to receive options worth ILS 42 million (USD 10.04 million), while Dov Weisglass, the chairman, Bezeq, might have got options worth around ILS 6 million (USD 1.43 million).

The staff stock options programme provides workers with a 50 percent discount on the purchase of 78.2 million shares or 3 percent of issued capital.

Bezeq International is online at http://www.bezeqint.net/. Further details about Bezeq are available by phoning + 972 3 925 7593 or visiting http://www.bezeq.co.il/.
popularity due to the merger. The company will promote its VoB services and also plans to launch WiMAX services.

Moreover, it will also launch campaigns to develop its brand name in Israel’s Internet access and international telephony markets.

For additional information about Internet Gold, please visit its investors' site at [www.igld.com](http://www.igld.com) or contact Mor Dagan, Investor Relations at +972-35-167-620. You can also contact Idit Azulay, Internet Gold by phone at +972-39-399-848 or via email at idita@co.zahav.net.il.

**JORDAN:**

**MobileCom selects Javna to deploy BBC TV service**

MobileCom has awarded a contract to Javna in a bid to offer BBC TV service to its customers. Under the terms of the contract, Javna will provide mobile solutions that will support Live TV streaming on a cellphone.

According to Mansour Mansour, the CEO of Javna, the contract would provide an opportunity to the company to deliver latest wireless solutions to Arab companies. Mansour added that the company has used its solutions to help telecom companies to offer Live TV streaming of various satellite stations such as AlJazeera and CNBC Arabiya.

Javna has assisted numerous Arab and international companies to offer Live TV services to their customers.

The reason for the selection of Javna’s solutions was that the company’s mobile TV streaming platform is compatible with a number of communication networks. In addition, the solution provides the final content in the 3GPP format, which is supported by majority of smartphones.

The new service will help MobileCom to increase its subscriber base as the service possesses a huge potential. At present, the mobile entertainment market is witnessing a surge in demand for latest services.

For more information about the company, please visit [www.mobilecom.jo](http://www.mobilecom.jo).

---

KENYA:

Kenyan PIC investigates ownership of Safaricom

The Kenyan Public Investment Committee (PIC) has sought assistance from Serious Fraud Office of Britain to investigate the ownership of Safaricom.

In 1999, Safaricom was established as a joint venture between Telkom Kenya (60 percent) and Vodafone (40 percent). The government has decided to float shares of Safaricom as an IPO.

However, after speculations that Mobitelea Ventures owns a 5 percent stake in Safaricom, the IPO process has been put on hold. In addition, PIC is investigating the authenticity of rumours.

Justin Muturi, the chairman of PIC, stated that the committee has sought for assistance from two officials of the British fraud office. Muturi added that Mobitelea was the advisor to Vodafone in its Safaricom venture in 1999.

Safaricom is online at http://www.safaricom.co.ke.

KUWAIT:

Wataniya selects Noutique to provide live TV services

Wataniya Telecom has selected Noutique, the business partner of Irish-based Vimio, to provide live content on mobile handsets. Noutique will deliver mobile solutions to Wataniya, which would enable the company to offer live content to its 8.8 million subscribers.

According to Malachy Harkin, CEO of Vimio, the contract marks the strong association of Noutique with major telecom operators in the Middle East and North Africa. This association will help Vimio in establishing a strong foundation to generate significant revenue.

Harkin added that the contract provides the company with an opportunity to strengthen its presence in the Middle East and North Africa. The company continues to seek similar opportunities to offer its services in the region.

Wataniya will utilise Vimio’s Live TV software to provide its customers with a number of live TV channels and traffic channels in Kuwait. The company plans to price the service at USD 12-20 per month.
LEBANON:

The Lebanese TRA all set to be operational by April

According to Kamal Shehadi, the president of the Telecom Regulatory Authority (TRA) of Lebanon, TRA is all set to commence operations by April 2007. Shehadi informed that TRA has appointed its board members and will take up the responsibility of the Ministry of Telecommunications (MoT) from April 2007.

Shehadi added that the primary goal of TRA is to liberalise the Lebanese telecom sector. TRA plans to award two mobile licences and one state-owned telecom licence in 2007.

According to various media reports, the government expects to generate around USD 3 billion from each licence.

At present, Oger Telecom is the sole fixed-line service provider in the country. MTC Touch and Alfa are the only two mobile operators in Lebanon.

In 2002, the government had passed a law to establish TRA. However, due to numerous factors, such as internal strife between politicians over nominations of board members, it was postponed.

According to TeleGeography, the government had concluded that a separate entity was required for the regulatory function. The MoT has now been asked to establish two separate entities that will manage state regulations and operational departments.

The database also highlights the major responsibilities of TRA. TRA will manage the telecom market and the liberalisation process, issue licences to network and service providers, issue wireless spectrum and protect consumers.
MALAWI:

Five to battle for the Malawi licence

The Malawi Communications Regulatory Authority (MACRA) announced that Econet Wireless, Milleniium Global Telecom and three Malawi-based companies have applied for Malawi’s third mobile licence.

MACRA also announced the initiation of the selection process for the third mobile licensee. The regulatory body informed that 5 out of the 11 companies which were issued the bidding documents managed to file their application forms with the MACRA.

The licence provides a huge opportunity to all the five companies as the demand for mobile services in Africa have increased significantly in the recent past. The increase in demand is attributed to the unreliable and expensive fixed-line infrastructure.

At present, Malawi has a mobile subscriber base of 600,000. The country is dominated by Celtel and Telekom Network Malawi.

NIGERIA:

Mubadala seeks partner to commence services in Nigeria

Mubadala Development announced that it expects over 10 companies to file bids to establish a business in Nigeria. Mubadala was awarded a licence to deliver mobile, fixed-line and broadband services in Nigeria. The company had paid USD 400 million for the licence.

Waleed al-Mokarrab al-Muhairi, COO of Mubadala, stated that the company is seeking a partner to deliver telecom services in Nigeria. The partnership is estimated to be investing nearly USD 500 million for its telecom operation.

The licence provides Mubadala a huge opportunity to offer services in a country, with a mobile subscriber base of 20 million out of the total population of 140 million.

At present, three major players (MTN, Globacom and Celtel) are operating in the Nigerian mobile market. The market has witnessed an investment of nearly USD 10 billion in the last five years.
NCC postpones payment deadline by seven days

The Nigerian Communications Commission (NCC) has postponed the last date of the payment for the provisional licences by seven days. NCC had issued licences to four telecom companies (MTN Nigeria Communications, Celtel Nigeria, Globacom and Alheri Engineering) to introduce 3G mobile services in the country in March 2007.

Initially, the time-period provided by NCC to pay the USD 135 million for licence to offer mobile services in 2 GHz spectrum was 14 days. The 3G services will allow the mobile operators to offer a wide range of services such as voice, data, high-speed Internet and mobile-TV.

According to various sources, the issuance of the four equal blocks of 10 MHz – Block A, 1920-1930 MHz, paired with 2110-2120 MHz; Block B, 1930-1940 MHz, paired with 2120-2130 MHz; Block C, 1940-1950 MHz, paired with 2130-2140 MHz and Block D, 1950-1960 MHz, paired with 2140-2150 MHz will be provided on first-come, first-serve basis. The company that manages to complete the licence agreement first will be allowed to choose the spectrum block they want.

Telkom in the process of acquiring 75 percent stake in Multilinks

Telkom is on the verge of closing a USD 200 million acquisition deal with Multilinks. Under the terms of the deal, Telkom will purchase a 75 percent stake in Multilinks.

The acquisition deal has been approved by the Nigerian Communications Commission (NCC). The deal follows the acquisition of VGC Communication by MTN Nigeria for USD 65 million.

Ezekiel Fatoye, the executive director of Multilinks, confirmed that NCC has provided the anticipatory approval to both the companies. Fatoye added that the acquisition process is expected to be completed by May 2007.

In 1997, Multilinks introduced its services commercially in Nigeria. This had resulted in the end of the monopoly of NITEL in the country. In June 2006, the company was awarded a Unified Access Service Licence (UASL) that enabled
the company to deliver a wide range of services including voice, Internet and data.

Multilinks was the first company in Nigeria to launch wireless telephony and Internet services using CDMA 2000 1X technology.

Telkom is online at http://www.telkom.co.za.

**OMAN:**

**Omantel signs OMR 7 million contract to offer ADSL services in Oman**

Omantel has signed an OMR 7 million (USD 18.23 million) deal with a Chinese company in a bid to offer ADSL services in Oman.

Saud bin Nasser Al Shikali, the chairman of the board of Omantel, was present at the contract signing ceremony. The deal is line with Omantel’s plans to launch next-generation network in the country, which will help in the development of the telecom sector under the leadership of Qaboos bin Said, the Sultan of Oman.

The deal will also allow Omantel to deliver a wide range of telecom services to its customers. The company is expected to roll out lines between 100,000 and 180,000 to offer ADSL services in the country.

For further information about Omantel, please contact Mohammed Bin Ali Al-Wahaibi, the executive president of OmanTel, by phone and fax on +968-631-501 and +968-697-216, respectively, or via email at ceo@omantel.co.om. Omantel is online at http://www.omantel.net.om.

**QATAR:**

**3G international video calling service introduced in Qatar**

Qtel has introduced a 3G international video calling service in Qatar. The new service will allow Qtel’s subscribers to make call to 90 operators across 50 countries.
Users will be required to have a 3G handset and be within Qtel’s network coverage area. At present, Qtel offers its 3G network to Doha and its neighbouring areas. The service can be availed by post-paid as well as Hala pre-paid subscribers with no activation or monthly subscription fee.

In addition, users can only make a 3G international video call to a country if the country is covered under Qtel’s 3G roaming agreement. For information regarding the countries that are covered under the roaming agreement, users can call at 111. Users can also find out the information from any of Qtel’s service outlets.

Fahad bin Jassim Al Thani, the executive director of Qtel, the launch of international video calling depicts the efforts made by the company to provide its customers with affordable services that allow them to communicate with friends and family outside Qatar.

Qtel will charge a standard peak/off-peak rate for the call, in addition to the international mobile charges. The company has priced outgoing calls to GCC and European countries between QAR 1.96 (USD 0.54) and QAR 2.60 (USD 0.71) per minute.

Calls made to Japan, Malaysia, New Zealand, Korea and the UK will be charged between QAR 3.90 (USD 1.07) and QAR 4.60 (USD 1.26) per minute.

Qtel is available online at www.qtel.com.qa. For further information about the company, please call +974-4-380-000, or write in to info@qtel.com.qa.

Qtel inks deal with Siemens to manage UMTS network

Qatar Telecom has inked a managed service contract with Siemens Networks. Under the terms of the contract, Siemens will manage the operation of Qtel’s UMTS network in Qatar. Siemens will supervise, maintain and enhance the capacity of the network.

The contract is an extension to the service partnership between the two companies since June 2006. Siemens’ network operation centre will be responsible for supervising the network.

The reason for selecting Siemens for the contract was the experience and technical know-how of the company. Abdul Aziz I. Fakhroo, the senior manager wireless networks at Qtel, stated that partnership with Siemens will help the company in meeting its growing demand for UMTS services in the country.
Rotana selected to offer digital services in Qatar

Qtel has signed a contract with Rotana Audio Visual to deliver digital entertainment content to its customers in Qatar. Under the terms of the contract, Rotana will provide a wide range of services, such as mobile TV, triple-play, music and video clips, to Qtel’s customers.

According to Naser Marafih, CEO of Qtel, the contract is in line with the company’s plans to expand its business and increase its customer base. Marafih added that Rotana was selected due to the popularity of its solutions in the Middle East.

Rotana was established in 1987, and controls a film production company, a magazine, a record label and six TV music channels.

Qtel is available online at www.qtel.com.qa. For further information about the company, please call +974-4-380-000, or write in to info@qtel.com.qa.

RWANDA:

Lundh appointed as the new CEO

Terracom Communications has appointed Chris Lundh as the new CEO of the company. Prior to this, Lundh was working with Gateway Communications in Sierra Leone and South Africa.

Lundh has replaced Greg Wyler who has been appointed as a board member in Terracom Sarl. Lundh has been working in the telecom industry since the last 10 years and has worked in the senior management for 15 years in Congo, Nigeria, Benin, Sierra Leone, South Africa, China and Bolivia.

Lundh will be responsible for managing the financial investment, which will be utilised to enhance the quality of service, network coverage and subscriber base.
Terracom has also appointed Peter Bartig as the VP of finance and customer care for Terracom Sarl.

Terracom is online at http://www.terracom.rw/.

SAUDI ARABIA:

**MTC, the highest bidder for the Saudi Arabian mobile licence**

The consortium led by MTC has made a bid of SAR 22.91 billion (USD 6.11 billion) for the third Saudi Arabian licence to offer mobile services in the country; the highest bid offered by any of the seven consortiums.

The company awaits the approval of the Saudi Arabian council of ministers. If the company manages to win the approval, the licence will provide MTC the opportunity to deliver mobile services in the largest telecom market under the Gulf Cooperation Council (GCC) with a population of 26 million. The Saudi Arabian market is one of the largest economies in the Middle East and Africa with a GDP of USD 350 billion.

This licence will strengthen the company’s position as a telecom operator in the region. The licence offers MTC huge opportunities as the country has a mobile penetration rate of 70 percent as compared to 118 percent in the remaining GCC countries.

At present, MTC owns a 50 percent stake in the consortium. This value will be reduced to 25 percent after the issuance of licence to the consortium. The 25 percent stake will be floated as an IPO. This process is in accordance with the licence agreement issued by the government.

According to analysts, MTC is likely to win the licence as the company has the experience and the skill set to deploy services in the country. The company has already rolled out its networks across 11 countries.

The company will utilise its existing product portfolio to deploy a next-generation network that will enable the company to offer a wide range of services such as high-speed data and other value-added services.

For further information about MTC, please contact Ibrahim Adel, MTC Investor Relations Manager, PO BOX 22244, Safat, 13083 Kuwait by telephone on +965-464-4954, fax +965-484-6992 or by email at i.adel@mtc.com.kw.
SOUTH AFRICA:

MTN witness 1,000 percent rise in broadband subscriptions

MTN has announced that the company has witnessed a significant increase in the number of subscribers to its data bundle and price plans subsequent to the decline in the prices.

Brian Seligmann, the data bearers and products manager at MTN, stated that the number of subscription has increased by 1,000 percent after the decline in tariffs.

The increase depicts that the broadband market in South Africa will experience a considerable boost if operators charge the appropriate price for the service. It also marks the increase in popularity of broadband services in the country.

Although the increase in subscriber base will lead to problems such as inadequate bandwidth to support the traffic, Seligmann clarified that MTN has sufficient bandwidth on its IP network. The company is also upgrading its GPRS core systems in order to enhance the throughput of the system.

For further information about MTN, please contact the company in Cape Town (South Africa) on +27-214-017-400 or visit http://www.mtn.co.za.

UGANDA:

Uganda telecom sector to witness a surge in competition

Competition in the Ugandan telecom market is expected to increase following the issuance of the fifth telecom licence by the Uganda Communications Commission (UCC) by the end of March 2007. Warid Telecom is expected to win the licence.

In the first half of March 2007, UCC issued the fourth telecom licence to Hits Telecom. In addition, Hits Telecom has announced that it will invest USD 150 million to introduce its services in the country. Analysts believe that this will result in an increase in competition in the Ugandan telecom sector. Moreover, they have also alleged that the bid made by Hits was low as compared to the
estimated value of the licence.

However, Fred Otunnu, the corporate affairs manager of UCC, confirmed that Hits had paid all the charges including a fixed charge of USD 2,500 as processing fee, initial fee of USD 100,000 and an annual licence charge of USD 10,000.

According to Erik Van Veen, the chief commercial officer of MTN, the company had anticipated an increase in competition subsequent to the issuance of the third licence to Celtel. In July 2006, UCC ended the dominance of MTN and Uganda Telecom by issuing a licence to Celtel.

The increase in competition will provide customers with more options from which to choose from, which will lead to a decrease in tariffs and rise in the mobile penetration in the country. This will also lead to companies providing telecom services in rural areas.

MTN has earmarked USD 52 million for upgrading and expanding its existing network in a bid to enhance its subscriber base. Hits Telecom plans to employ the latest technology to offer new and innovative services to its customers in the country.

For further information about MTN, please contact the company in Cape Town (South Africa) on +27-214-017-400 or visit http://www.mtn.co.za.

UNITED ARAB EMIRATES:

Oger plans to complete two acquisitions prior to IPO

Oger Telecom plans to successfully complete at least two acquisition deals prior to the floating of its shares as an IPO in 2008. The announcement follows the news that Oger Telecom failed to win the bid for the Saudi Arabian licence.

Oger will invest USD 4-5 billion for its acquisition plans. The company also plans to buy a stake in Kazakhtelecom.

In November 2006, Oger had planned to release an IPO. However, the company postponed its plan due to slump in the Gulf Arab market.
YEMEN:

**Batelco to acquire 20 percent stake in SabaFon**

Batelco plans to acquire a 20 percent stake in SabaFon, a GSM operator in Yemen. The company will pay USD 144 million in cash for the stake to Hameed Al Ahmar, the chairman and the largest shareholder of SabaFon.

Millennium Finance Corporation will assist Batelco in acquiring the stake, while Chescor Capital will help SabaFon in the deal.

Post acquisition, the Al Ahmar Group will still be a majority stake holder in SabaFon.

At present, SabaFon has around 500 base stations across Yemen. It had reported a subscriber base of 1.2 million in February 2007. The company controls 40 percent of the telecom market in Yemen.

Shaikh Hamad bin Abdulla Al Khalifa, the chairman of Batelco, explained that the acquisition is in line with the company’s strategy to concentrate on emerging markets in terms of broadband and mobile business. Al Khalifa stated that the partnership depicts the strong association between Bahrain and Yemen.

According to Peter Kaliaropoulos, the CEO of Batelco, the share in SabaFon will provide the company a means to enter the Yemenis mobile market. The deal will also enable Batelco to expand its operations in areas adjacent to Yemen.

Tarik Al Haidary, CEO of SabaFon, stated that the partnership with Batelco will assist the company in strengthening its position as a telecom operator in the country and offer telecom services to regional areas.

Batelco is available online at [www.batelco.com](http://www.batelco.com). For further information about the company, please call +973-1-788-1881.

For additional information about SabaFon please visit [http://www.sabafon.com](http://www.sabafon.com).

Additional Information

About this newsletter

Africa & Middle East Telecom Week (AMETW) is a paid-for subscription service, which delivers 46 issues per twelve month subscription period. The title covers all aspects of regional wireless and wireline ews, and is sent via e-mail each Thursday as a PDF attachment.

All published issues and articles are additionally archived in our subscriber-only Internet archive. Full-year AMETW subscribers are issued, upon request, with an archive password for the duration of their subscriptions, once receipt of payment is confirmed. The AMETW archive is searchable by keyword searches or by complete back issues. (E-mail editor@blycroft.com to request an archive password).

The archive additionally contains a range of Paul Budde Communication (PBC) country reports on AME countries. Through an arrangement with PBC, as part of your annual AMETW subscription you are provided with access to 12 new country reports per calendar year, as they are published monthly within the Archive.

You are also given access to all pre-existing archive reports.

Blycroft's definition of the Africa and Middle East region includes, but is not limited to, the following countries: Algeria, Angola, Benin, Botswana, Burkina
Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of Congo, Djibouti, Egypt, Equatorial Guinea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea Bissau, Ivory Coast, Kenya, Lesotho, Liberia, Libya, Madagascar, Malawi, Maïi, Mauritania, Mauritius, Mozambique, Morocco, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somali Republic, South Africa, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Western Sahara, Zambia, Zimbabwe, Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, United Arab Emirates, Yemen.

Please note that editorial coverage of these respective regions is disproportionate.
